RE: Blue Bamboo (HK), Ltd

FCC ID: UWJH50CM02

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please explain what is to be Certified – (1.) the RF module only, or (2.) the RF module when installed in the H50 terminal? This filing as it stands is confusing.
- 2.) The Manual claims an RF category Mobile (20cm) restriction. Please justify why the Applicant believe this device qualifies as RF category “Mobile” and not “Portable”.
- 3.) Looking at the external photos, it appears this device has a USB connection, thereby making it possible for this device to connect to a computer. The Label contains an FCC logo implying that this device was tested under the DoC provisions for equipment authorization. Kindly indicate in which country this device was tested for DoC compliance..
- 4.) FCC Rules require that all devices shall be shipped in such a fashion that the FCC ID will be visible to the end user before being placed into service. Typically this means shipping with the battery removed from the device. Will the Applicant agree to these guidelines? If so, a separate attestation shall be required.
- 5.) The Operational Description is insufficient. Kindly describe from a circuit level perspective how this device creates, modulates and amplifies RF energy.
- 6.) All Licensed devices are required to include a Tune-Up procedure for Certification. Please provide.
- 7.) Please provide a Parts List for the RF portion of this device.
- 8.) Please provide a Block Diagram for the RF portion of this device.
- 9.) It does not appear that a Schematic has been provided for the RF portion of this device. If I am mistaken, my apologies. Could you kindly indicate where on the Schematics the antenna will connect?
- 10.) Form 731 must show radiated power for both ERP for Part 22 and EIRP for Part 24. Please submit a revised Form 731.
- 11.) As required by Part 2 of the Rules, please provide the voltage and current through the final amplification stage of this device.
- 12.) There does not appear to be a signed Confidentiality Request for this device. Please reply in writing that Confidentiality for this device will not apply.
- 13.) The form 731 submitted does not have a title or signature for Huian Gao. Please sign, date and provide a title for this individual.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
